

ALI FAAZ

Software Engineer | Full Stack Developer | AI Enthusiast

+91 9440054628 | humayunfaaz@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Ambitious Software Engineer and Full Stack Developer passionate about building impactful products at the intersection of web technology and AI. Skilled in designing clean, scalable software architectures across modern JavaScript/TypeScript ecosystems, with hands on experience building browser based applications using computer vision and speech technologies. A proven problem solver and fast learner, recognized as a Top 5 finalist among 179 teams at a competitive hackathon, with a strong interest in scalable systems and production grade engineering.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, C++, Python, HTML5, CSS3

Frontend: React.js, Next.js, Tailwind CSS

Backend: Node.js, Express.js

Database: MongoDB, Mongoose

AI & Computer Vision: MediaPipe, WebAssembly, Web Speech API

Developer Tools: Git, GitHub, VS Code, Vercel, npm

FEATURED PROJECTS

CareSpeak: Assistive Communication Platform

Tech: Next.js, TypeScript, Tailwind CSS, MediaPipe, WebAssembly, JavaScript, Web Speech API

- Built a privacy first, browser based assistive communication platform delivering real time hand and eye gesture recognition entirely on device, eliminating server round trips and protecting user data.
- Engineered a gesture to speech pipeline using MediaPipe and WebAssembly for low latency, in browser AI inference, converting recognized gestures into multi language text to speech output.
- Implemented QR code based device pairing for frictionless cross device setup, streamlining onboarding for assistive technology use cases.
- Designed a responsive, accessibility focused UI in Next.js and Tailwind CSS, optimizing rendering performance for real time, low latency interaction.
- Selected as a Top 5 team out of 179 competing teams (~700 participants) at VYNEDAM Talent Hunt 2K26 for CareSpeak's technical execution and real world impact.

AliFaazVerse: Personal Portfolio Platform

Tech: Next.js, React, Tailwind CSS, TypeScript, JavaScript, Git, GitHub, Vercel

- Designed and deployed a modern, SEO optimized developer portfolio using Next.js and TypeScript to showcase projects, skills, and professional branding.
- Built reusable, modular React components with Tailwind CSS to maintain a clean, scalable, and maintainable codebase.
- Improved site performance and Core Web Vitals through code splitting, image optimization, and responsive design practices.
- Deployed and version controlled via Vercel and GitHub, enabling fast, reliable iteration and continuous delivery.

ACHIEVEMENTS

Top 5: VYNEDAM Talent Hunt 2K26

- Ranked among the Top 5 teams out of 179 participating teams (approximately 700 participants).
- Built CareSpeak, an assistive communication platform, during the hackathon.
